WEATHERCOAT ANTI DUSTTT
PREMIUM EXTERIOR EMULSION

Product Description
WeatherCoat Anti Dustt is a high-performance paint with rich, soft sheen. It is formulated with special grade of acrylic emulsion and additives. The paint has unique dust repelling properties owing to the presence of Dust Guard Technology. It is also resistant to chalking, flaking, fading, algae and fungal growth. Walls painted with WeatherCoat Anti Dustt retains the look of the paint for a longer time compared to conventional exterior paint.

Recommended Use
Exterior plastered surfaces and concrete blocks

Colour Range
Over 2,000 shades

Finish
- VERY HICH
- HIGH
- MEDIUM
- RICH SOFT SHEEN

Toxicity
VOC - < 50 gm/lt

Coverage
60 -70 sq.ft/ lt/2 coats, under ideal test conditions. (Coverage may depend on factors like surface conditions, surface preparation, application skill, weather conditions, dilution etc.)

Recommended Undercoats
Putty: For wall/ plastered surfaces – Bison Wall Putty

Recommended Surface
Sand, cement plaster, asbestos, brickwork, concrete block and fiberboards

5-8 at 60° GH when released

Application Method
Brush / Roller / Spray

Recommended Thinner / Cleaner
Potable water

Dilution of dark shades only
Maximum dilution should be 10 – 15 % depending on shade. Coverage may be less compared to light shades.

Rich Soft sheen
Rich, soft sheen finish enhances the beauty of the house

Anti-algae & Anti-fungal protection
Provides long-lasting protection against fungus and algae on the walls

No black streaks
Walls are free from stains and black streak marks caused by dust deposition

Dust Guard
Exceptional dust resistance keeps your walls sparkling clean

Green Pro Certified
Validates our effort in striving towards cleaner, more sustainable future.
WEATHERCOAT
ANTI DUST
PREMIUM EXTERIOR EMULSION

Surface Preparation
For fresh/new surfaces: Strip all loose particles from the surface with wire brushing and by scraping, followed by a wipe down. Wash the surface down with water and allow it to dry.

Apply 1 or 2 coats of Berger Bio-Wash solution (5%v/v) and allow it to dry overnight.

Wash it again the next day with potable water. Allow the surface to dry fully.

Apply one coat of primer and allow it to dry for 6 – 8 hours.

For Previously Painted Surfaces: Strip all the old paint and remove all the loose particles before starting the above process.

Directions for Application
Dilute the paint as per the recommended dilution ratio. Apply the first finishing coat and allow it to dry for at least 6–8 hours. After the first coat dries, apply the second coat and allow it to dry overnight.

Special Note
Before painting, the following things should be checked thoroughly:

- Ideal moisture content of the wall should be below 12%
- Ideal pH value of the wall surface should be between 7-11

Points to Note
- Shake well before use and do not over dilute
- Strain the material through a fine sieve before use
- Keep the container tightly closed to prevent drying
- Scrape off old paint thoroughly before painting starts
- Gyro shake well after tinting through CB Machine
- Do not apply paint on lime washed surfaces or damp wall
- Keep out of reach of children and away from foodstuff
- In case of contact with eyes, wash immediately with water and seek medical help
